Activating Seniors in volunteer structures

Diversify on the local level

Recognition and support for care givers

3

Innovation in COMMUNICATION very much needed; From the perspective of care patients

4

Communication improvement: people (peer to peer), local government - policy level

Accès to reliable information

Target group involvement in the decision making (avoiding patronazation)

Problem of double (multiple) discrimination; e. g. Roma, above 65, women; health indications; etc.

Supporting informal caregivers (family etc.)

Challenge to reach the people who need the services; Identification needed

Psychological Counseling needed

1

Data cllection

Policy Level: Covid19 as a challenge to the conventional medical paradigm towards preventive medicine and also mental health (care)

WS 4: New Care Models and Impacts

5

Mass media communication focusing more on older people and generations

To involve older people in the design of solutions on all levels, including also the policy level

Increase the role of local authorities in development of care solutions

2

Inform inclusiv and targeted answer to the emergency

6

Problem: missing reliable data; Especially under the Covid condition: Data disaggregation needed (age groups etc.)

Better coordination of local authorities is also needed to reach more people and be more efficient

Domestic abuse (physical, mental, financial neglect) needs to be considered in a more comprehensive fashion

Human rights approach (not generosity by government)

7

Influencing AGE in the perception positively

Transnational learning structures

Closing the digital divide; Bringing in people using the www as a public space; (Understood as a human right)
